fabrication products since 1989.*

## Industrial Pallet Racks

This pallet rack system is designed to hold 6,500 lbs. per shelf. The three shelf sizes allow for maximum use of space for the customer. The customers' maintenance team installed it; although we offer installation. It was designed, CAD drawn, P.E. stamped, fabricated and delivered by our talented staff. It measures 16' tall, 18' wide and approximately 5' in depth. It was a heavy duty project that took careful design, planning of fabrication and delivery to ensure this job was done effectively and safely. Great job by all!

## Industrial Storage Bins

Manufacturers have material, products and supplies of various shapes and sizes. Each request for these industrial storage bins is customized. These storage bins measure 4' (w) x 6' (h) x 18" (d). Each unit has 16 bins and is equipped with fork truck attachments for easy mobility. All six units were fabricated, primed, painted, and delivered by our talented staff.

## Chicken Cooker

The summer grilling season is here and now one more customer is ready for it! This chicken cooker measures 3' (w) x 5' (l) x 4' (h) and is equipped with expanded steel for a flat surface cooking area. It has handles on each end for easy mobility and a steel bottom to build a fire. We can offer variations for BBQ pits and even just the grates. Call us today to design your project.

## Hand railings

Hand railings can come in numerous shapes, sizes, materials, and finishes. This railing project at Alfred University was far from the standard job. The railings spanned approximately 52' with a 154° bend and approximately 14' elevation change. They were fabricated using 1 1/4" Schedule 40 pipe, galvanized, installed and then painted black. The galvanizing will protect them from rusting.

## Reinforcing Bar

Don't forget we supply, cut and bend rebar! We stock #4, #5, #6, and #8 and have one day availability to other sizes. Stock pieces are 20' but any shape and size is available. Call us today for a quote on your next project. We provide quick turn arounds on quotes and completed jobs.
