Capabilities

Plasma Cutting

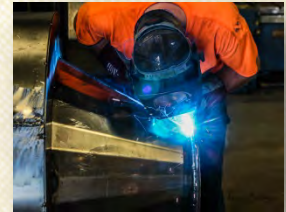

Bending and Forming

Steel & Sheet Metal Fabrication

Producing quality sheet metal and steel fabrication products since 1989.

Blueberry Sorting Cart

It was berry season even at BSM! We recently completed a sorting machine for a local grower. The berries and any weeds and twigs are loaded in the top conveyor (left). There is a blower that separates the waste into a screen (top) and out the chute. The berries continue to the next conveyor (right) for sorting and drop into storage bins. This was completely designed and fabricated in house. The final product works great, we thank all our employees on this project, it was definitely a team effort.

MJ Painting Contractor's Gates

As part of the finishing touches on the capital improvement project at MJ Painting, we installed two motorized entrance/exit gates. The gates span 30' and 40' and were designed, fabricated, and install by our BSM staff.

Parts Washer Basket

The name says it all. This basket will be used to hold materials while it is blasted clean. Inside stabilization holds the product in place and tabs on the top allow for lifting up to 1,100 lbs. Finished with automotive grade paint.

Wall Divider

Check this out!! Does the design resemble anything in particular? If you're a Yankee baseball fan you will recognize it. It's a replication of the top fencing at Yankee Stadium. It was fabricated using steel material, laser cut and painted. It's going to be in the Olean area in the near future. We can't giveaway where, but when you see it you will know it is a BSM product.

Aluminum Railings

These aluminum residential railings were fabricated to match the existing exterior railings we did a few years ago. They were fabricated using all aluminum railings, channel and balusters; then painted with a specialized paint for aluminum.

BSM is on YouTube

Check out our YouTube channel for videos of fabrication, capabilities and company introduction video. We can be found at Billings Fabrication Services.
